### Testronic Labs - Wireless USB Certification Service

Testronic Labs is proud to announce its new Certification service for Wireless USB. The program will help to ensure interoperability across Wireless USB products, build confidence in Wireless USB technology, and promote Wireless USB as the first choice for wireless multimedia connectivity and interoperability between devices in a personal area network. All of this will be possible with high speed, high security and ease of use.

Moving on from our existing USB services, Testronic Labs now provides Certification Testing of Wireless USB products using the Wireless USB protocol (based on WiMedia).

Utilizing the most powerful tools on the market, Testronic Labs can perform all mandatory and additional tests for Wireless USB.

Wireless Interoperability Suite  
Wireless PER Suite  
Wireless USB CV  
Wireless USB EVM Suite  
Wired USB 2.0 Electrical Suite  
USB 2.0 Gold Suite  
WiMedia platform based tests

Testronic Labs can perform WIRELESS USB CERTIFICATION for all product types (WHCI based hosts, HWAs', DWAs' or Native Wireless USB Devices).

The combination of experience and early adoption of new technology makes Testronic Labs your best option for product testing and verification.

### Testronic Labs - Your hardware test centre

Testronic Labs operates as an independent test centre for the validation and release of multimedia peripheral equipment and interfaces. Testronic Labs offers a wide range of testing activities and has become a professional test centre for numerous companies all over the world - a test house known for its quality of testing and dynamic approach.

Thanks to the independence of its test laboratories, Testronic Labs is ideally placed to offer an objective, third party opinion on the overall quality of products in development.

For more information about the contents of Testronic Labs' Wireless USB Compliance service, please see [www.testroniclabs.com](http://www.testroniclabs.com).

For prices, practical information or to schedule test, please contact us at: [usb@testroniclabs.com](mailto:usb@testroniclabs.com)

### **Advantages of Testronic Labs Testing Services**

You do not have to attend testing. However, if you wish you can attend the test **at no additional cost.**

Should our test engineer encounter problems, you will be contacted immediately and the project will be put on hold at your request. This does not imply that everything needs to be re-tested but gives you the opportunity to rectify the issue and send fixed devices. Alternatively you can come over and fix the problem at our labs **at no additional cost.**

Questions before, during, or after your project relating to the **Wireless USB Certification Service** will be answered by phone or mail **at no additional cost.**

We do **not require pre-payment** for the project. If we have a purchase order and the products, we can start testing within days. You will only receive an invoice when the project is complete.

The lead time for a certification project is usually less than a week. Factors that may influence this lead time tend to be problems that we encounter when we undertake testing.

High degree of confidentiality: Your product will be handled with complete confidentiality. As an independent testing centre we treat your product with the utmost discretion.

Consulting: Our dedicated engineering department will be pleased to assist you during the development of your product. Our extensive experience is at your disposal.
