

Functionality and Compatibility Testing

Testronic Labs® – Leader in Quality Assurance

- *Can your customers browse and transact with your site successfully?*
- *Does your site work well on different browsers and devices?*
- *Are operational aspects of your site performing appropriately?*
- *Are web pages implemented correctly for analytics and search engine optimisation?*
- *Are there broken links or spelling mistakes on your site?*

With in-house experts and a range of proven tools, Testronic Labs offers manual and automated functionality and compatibility testing to meet your business needs throughout all phases of the website life cycle.

Depending on your preferred methods of working, we can provide:

- testing at our laboratories
- testing at your site
- access to tools for your own use
- a complete managed service

Testronic Labs ensures that your customers have an excellent experience, whichever technology is used.

Testronic Labs provides clients with tailored functionality and compatibility testing throughout the website life cycle.

Design & Development Phase

- Test functionality against business requirements
- Test using different browsers and any range of devices
- Report on issues with content – spelling mistakes, broken links etc.

Testing & Validation Phase

- End to end business process testing
- Integration testing – does your site work with legacy backend systems?
- Report on issues with content – spelling mistakes, broken links etc.

Monitoring & Management Phase

- Regular monitoring of content to ensure it meets business standards

Analyse & Optimise Phase

- Benchmark your site against your competitors' sites

Testronic Labs' QA specialists use a range of different tools to provide functionality and compatibility testing from our global network of laboratories and if required provide consultants to work with your team at your location. We provide a fast efficient service responsive to your needs and tailored to your business requirements.
