Leading the way in multimedia quality assurance

Testronic Labs- PMTC USB CERTIFICATION Service (Low, Full and High Speed, Wireless USB)

The USB Implementers Forum - USB-IF, founded by Intel, Microsoft, NXP, NEC, HP and LSI, has recognized Testronic Labs to handle USB certification for USB 2.0 compliant products.

Testronic Labs USB Certification Program for LOW, FULL and HIGH SPEED is the equivalent of certification processes outlined in official USB-IF Compliance Workshops (Plugfest). The product will be tested using procedures specified in USB-IF Compliance Test Procedures.

Testronic Labs can perform USB CERTIFICATION for all product types (device, host, silicon, embedded host, On The Go, hub...).

Testronic Labs. Your hardware test centre.

Testronic Labs operates as an independent test centre for the validation and release of multimedia peripheral equipment and interfaces. Testronic Labs offers a wide range of testing activities and has become a professional test centre for numerous companies all over the world, a test house known for its quality of testing and its dynamic approach.

Thanks to the independence of its test laboratories, Testronic Labs is ideally placed to offer an objective, third party opinion on the overall quality of products in development.

You no longer have to wait for - and to travel to - the USB-IF Plugfest in the USA, Taiwan or Japan to have your USB product certified.

The USB Implementers Forum has recognized Testronic Laboratories as able to handle USB certificates for USB 2.0 compliant products.

For prices, practical information or to schedule test time, please send an e-mail to usb@testroniclabs.com

Advantages of Testronic Labs Testing Services

You do not have to attend testing. However, if you wish you can attend the test **at no additional cost.**

Should our test engineer encounter problems, you will be contacted immediately and the project will be put on hold at your request. This does not imply that everything needs to be re-tested but gives you the opportunity to rectify the issue and send fixed devices. Alternatively you can come over and fix the problem at our labs **at no additional cost.**

In addition to the certification report, we provide you with the Ch8ck result. Ch8ck (Chapter 8 Check) is a test tool developed by Testronic Labs and gives you more in depth testing results **at no additional cost.**

Questions before, during, or after your project relating to the **USB Certification Program** will be answered by phone or mail **at no additional cost.**

We do **not require pre-payment** for the project. If we have a purchase order and the products, we can start testing within days. You will only receive an invoice when the project is complete.

The lead time for a certification project is usually less than a week. Factors that may influence this lead time tend to be problems that we encounter when we undertake testing.

High degree of confidentiality: Your product will be handled with complete confidentiality. As an independent testing centre we treat your product with the utmost discretion.

Consulting: Our dedicated engineering department is pleased to assist you during the development of your product. Their extensive experience is at your disposal.
